

Bio-Plastics by Nature

Technology at work for you

Today's consumers demand products that are more environmentally friendly. Issues such as diminishing resources, global warming plus overflowing and toxic landfills are driving changes in all aspects of our daily lives. As a result biodegradable, starch based technology has gained tremendous momentum and is now being widely considered as the polymer of the

future. Nviroplast with its pioneering spirit leads the industry in developing domestic and international markets for biodegradable food packaging. The company achieved its leadership position through innovation, creativity and the development of partnerships with our customers and vendors.

Nviroplast- The Next Generation in Plastics.

Sustainable Packaging Solutions for your business...

FEATURES AND BENEFITS
